43.3% of the 114 South-South Cooperation initiatives that Honduras implemented in 2016 were exchanged under a bilateral modality, 36% were regional and one in five were triangulations. Honduras acted as a recipient of SSC in most of that cooperation (practically two out three exchanges). It only participated as provider in 2 projects and 1 action under Bilateral SSC.

While the cooperation received by Honduras was very strongly oriented towards strengthening its capacities in the Social (Health and Other services and social policies) and Economic (Agriculture) sectors, the one it offered was geared towards support for public institutions and Extractive sectors. Mexico and Colombia stood out as its main partners in 2016. Finally, its SSC in 2016 aligned mainly with SDG 2 (Zero Hunger) and SDG 3 (Good Health and Well-being).
